

Abdullah Bin Zubair

(336) 929-3580 | abdullah.zubair035@gmail.com | [linkedin.com/in/abdullahbinzubair/](https://www.linkedin.com/in/abdullahbinzubair/)

Data Science and Machine Learning-focused Computer Science graduate with strong skills in Python, SQL, and ML frameworks. Experienced in building predictive models, performing preprocessing and feature engineering, and evaluating models using standard metrics. Strong foundation in machine learning, deep learning, and AI, with hands-on experience working on real-world datasets and workflows. Passionate about data-driven problem solving, AI innovation, and learning.

EDUCATION

North Carolina Agricultural & Technical State University
Bachelor's in Computer Science CGPA: 3.70

Greensboro, NC
Aug 2023 - Dec 2025

Guilford County Community College
Associate in Computer Science Transfer CGPA: 3.45

Jamestown, NC
Aug 2022 - July 2023

PROFESSIONAL EXPERIENCE

Lenovo

Whitsett, NC

Technical Process & Quality Analyst

Feb 2026 - Present

- Worked with enterprise hardware systems and operational data to support advanced quality analysis, testing validation.
- Used diagnostic tools and detailed test logs to troubleshoot, and validate highly complex issues across server rack systems.
- Automated quality tracking, reporting, and inspection workflows to improve efficiency and reduce manual human errors.
- Supported and monitored testing and assembly processes by performing quality checks and ensuring timely product delivery.

Springer Capital

Remote - Chicago

Data Automation Intern

May 2025 - July 2025

- Worked with financial and operational datasets to support internal advanced analytics, reporting, and business insights across.
- Used SQL to query, filter, and validate data from multiple sources, ensuring high consistency and data accuracy across.
- Automated routine data cleaning, formatting, and preparation tasks using Python to improve overall operational efficiency.
- Supported and monitored ETL pipelines by performing data quality checks and maintaining highly reliable data flows.

PROJECTS

House Price Prediction Using ML

- Developed a machine-learning model to predict housing prices using structured real estate features and engineered predictors.
- Performed data preprocessing including missing value handling, feature encoding, normalization, and exploratory analysis.
- Trained and compared regression models such as Linear Regression, Random Forest, and Gradient Boosting for best performance.
- Evaluated models using RMSE, MAE, R^2 score, and cross-validation to ensure robust and reliable price predictions.

Stock Price Trend Prediction

- Built a machine-learning pipeline to predict next-day stock price trends using historical OHLC data and engineered features.
- Performed data preprocessing including return calculation, volatility metrics, and moving averages for model readiness.
- Trained and compared classification models such as Logistic Regression and Random Forest to benchmark performance.
- Evaluated models using accuracy, confusion matrix, ROC, and F1-score, highlighting the effectiveness of the selected approach.

Network Intrusion Detection Using CIC-20 Dataset

- Built attention-based Transformer models for intrusion detection on large-scale CIC-20 network traffic data pipelines.
- Applied preprocessing, feature scaling, class restructuring, and targeted balancing to stabilize model training processes.
- Designed and trained a robust DNN baseline to benchmark performance against Transformer-based architectures.
- Assessed model performance using accuracy, precision, recall, F1-score, confusion matrix, and ROC-AUC metrics comprehensively.

AggieReview – Course & Professor Review Platform

- Developed a full-stack platform for students to review and rate courses and professors.
- Built a responsive front-end using React (Vite) with protected routes and role-based authentication.
- Designed the backend with RESTful APIs, integrating Firebase Authentication and a PostgreSQL database for secure data storage.
- Applied software engineering practices including SRS, layered architecture, UML diagrams, and test planning in an Agile team.

TECHNICAL SKILLS

- **Languages:** Python, SQL, Java, C++, Bash, HTML/CSS, JavaScript, R
- **ML/AI Stack:** Scikit-learn, TensorFlow, PyTorch, Pandas, NumPy, Matplotlib, Seaborn
- **Tools & Platforms:** Git, GitHub, VS Code, PyCharm, Jupyter, Google Colab
- **Data & Model Engineering:** Data Preprocessing, Feature Engineering, Model Evaluation, EDA, ETL Cross-validation, Model Deployment
- **Cloud & MLOps:** Google Cloud Platform (Vertex AI, BigQuery)
- **Coursework:** ML & AI, Deep Learning, Data Structures, Data Science, OOP, DBMS, Software Engineering, Web Development

CERTIFICATIONS

- Innovating with Google Cloud Artificial Intelligence – Google
- Dell GenAI Foundations – Dell Technologies
- Introduction to Generative AI – Google
- Introduction to Large Language Models – Google
- AgenticAI - DeepLearning.AI
- Using Python to Interact with the Operating System – Google
- LangChain for LLM Application Development – DeepLearning.AI
